Know Your Exit Strategies

Everyone should take the time to become comfortable with multiple exit routes from each location within LLE where they typically work or visit. In the process, note the locations of fire extinguishers, exit signs, and pull stations.

Developing multiple exit strategies from your home as well as places you visit such as theaters, restaurants, and hotels is also recommended.

Finally, notify a Safety Officer immediately if you notice an obstruction in an egress corridor or stairwell, or a problem with any exit sign or door hardware.
