It’s Spring Cleaning Time!

Make time to perform basic housekeeping in your lab and office before the NYS OFPC Inspection in late April. Good housekeeping contributes to improved safety and reduced fire risk. Therefore, everyone is expected to Spring Clean and purge obsolete materials.

Examples of known obsolete items being kept within LLE:

- Ancient LLE calendars
- Vintage phone books
- Antiquated computer software manuals
- Old catalogs from Grainger, McMaster-Carr, etc.
- Copies of LLE Reviews that are now online
- Poster boards from talks given years ago
- Materials from students long since graduated
- Archaic equipment suitable only for the Smithsonian

Your cooperation in disposing of this material is expected and appreciated.
