Name: ________________________________ Date: __________________

Department: LLE LLE Division/Group: ____________________________

Job Title: _____________________________ P.I./Managing Supervisor: ____________________________

I have completed an electrical safety training session specific to LLE. The material presented included:

**Training Requirements**

**LLE and University Policies**

**Cable Management in OMEGA**

**Magnetic Field Safety Guidelines**

**Design and Operational Considerations**

**Electrical Safety Inspections**

**Effects of Electricity**

The training emphasized that the work environment can present a variety of hazards to personnel, and equipment. Safety in labs is achieved by identifying the hazards present, having written information/resources available, establishing good operating procedures, good design, minimizing possible exposures by using engineering controls, good work practices, and personal protective equipment. Information was provided outlining the LLE Lockout / Tagout policy.

**Answer the Following:**

_____ 1. Do you understand that safety is a responsibility shared by all members of LLE?  
_____ 2. Do you understand that Electrical Safety training is a requirement of continued laboratory access?  
_____ 3. Do you understand that no one is expected to undertake a task that appears unsafe?  
_____ 4. Do you understand that any voltage 50 volts, or greater, is High Voltage?  
_____ 5. Do you understand the Lockout / Tagout policy at LLE?  
_____ 6. Do you understand that energized work requires a permit at LLE?  
_____ 7. Do you understand the LLE Cabling Guidelines?  
_____ 8. Do you understand the requirements for strong magnetic fields at LLE?  
_____ 9. Do you understand your safety responsibility as a supervisor, employee, contractor, student, or visitor?  
_____ 10. Do you have any questions regarding LLE’s electrical safety standards and expectations?
